

IAAME Training for Adoption Service Providers

IAAME is pleased to announce its upcoming training sessions for Adoption Service Providers (ASPs). The first four scheduled sessions will focus on the implementation of the revised Substantial Compliance System (SCS); see the schedule below. IAAME will also offer training sessions throughout the fall and winter specific to the regulations and standards in 22 CFR 96 related to a variety of topics including foreign supervised providers, parents acting on their own behalf, independent contractors, and other topics identified during the 2019 Adoption Symposium. In addition, IAAME will provide training related to various processes and procedures, including complaints, adverse action, and others in response to requests from ASPs. These training sessions will be offered virtually through live sessions, which will also be recorded and made available to ASPs for later viewing. Additional details regarding the training platform will be sent out shortly; our plan is to offer approximately two sessions per month starting in September 2020. We look forward to this opportunity to provide these trainings.

September 2020
